# Eliminate Costly Software and Save $$$ with Gmail Integration with iManage

The Gmail Integration with iManage is productivity software which empowers organizational users to automate a customized integration strategy for all Gmail accounts, populate profiles and save emails to desired client WorkSpaces. An automated Gmail Integration with iManage.

## KEY BENEFITS

- Eliminates the need to purchase office, exchange server, communication server, EMM and other related software packages

- Manage Gmail messages with iManage Work

- Add extensions to Gmail messages to access advanced iManage features

- Instantly search and save messages in Gmail format

- Easily send and file messages to desired folders and worksites with the iManage File button

- Save time and money by empowering end users

## THE CHALLENGE

iManage document management is the new frontier of system performance and organizational productivity. Legal firms, entrepreneurs and organizational leaders are searching for ways to integrate iManage with google apps and file emails directly from gmail to iManage work. Integrating Gmail improves efficiency and increases profitability by eliminating the need to purchase office, exchange server, communication server and other related software packages. That's why the document management experts at MacroAgility Systems have developed Gmail Integration with iManage to deliver a filing system to save emails to iManage Work.

Now it's possible to file emails directly to iManage work!
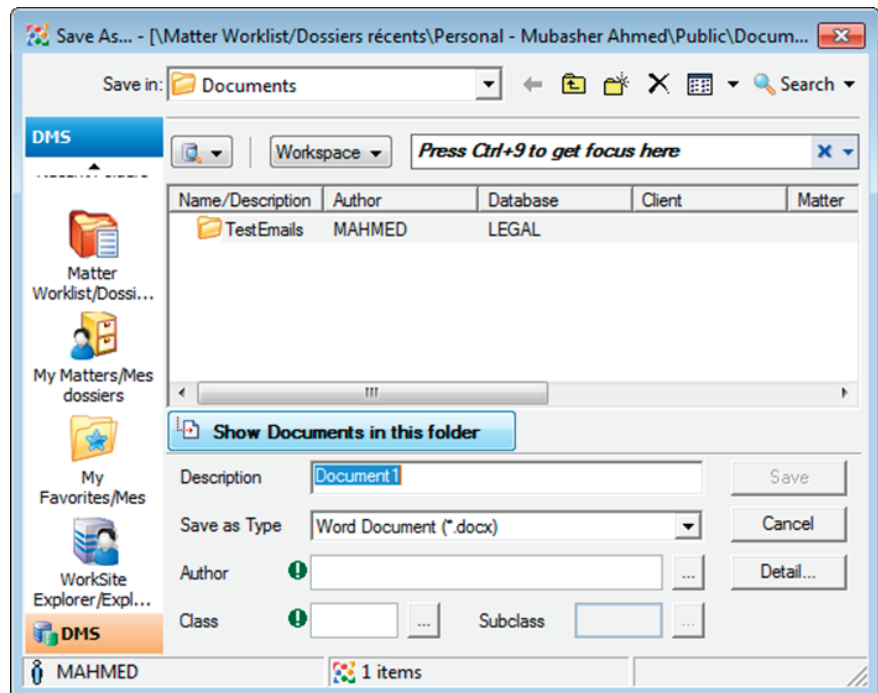

## THE SOLUTION

- The iManage **File** button or **Send + File to Worksite** button allows end users to automatically route emails to designated WorkSites. Simply employ the File button to file an email with the desired WorkSite.

- After the user clicks on the **Send + File to Worksite** button in the new message form or click on the 🎨 File button, it will open the WorkSite Save dialog box.

## Gmail2Work Modules

- Gmail Management Extension (GEE) -Gmail integration with iManage

- Gmail Filling Service (GFS) - Manage all emails records in the database

- Gmail Management (GM) -Saves the email to iManage Work

The user can then search for appropriate workspaces or folders and file the Gmail directly to a specific WorkSite.
