

Uplift Migration from on-prem to iManage Cloud

KEY FEATURES

- **Universal API Certification** by iManage guarantees the iSyncKit software will function seamlessly across On Prem, Work Cloud, and CloudiManage platforms
- **Pre-Migration Tasks** simplifies the process of migrating Captions, Users, Groups, Roles, Classes, Types, and Custom Values
- **Post-Migration Tasks** streamlines the migration of flatspace documents and folders, document relations, folder references, filing folders, my matters, my favorites, recent matters, and recent documents
- **Execute Deltas Routinely** to accommodate any changes in the source, such as the creation, modification, updating of files, folders, or workspaces
- **Map Profiles** feature enables users to replicate metadata or rectify invalid metadata during migration, removing the need for modifications to the source data
- **iManage imDBCheck Validation** feature offers the ability to determine which imDBCheck issues have already been resolved by the software and which issues require cleanup in the source database prior to running the iSyncKit migration software
- **Preserve Object ID** feature enables the retention of the original workspace ID, folder ID, and document number in the destination
- **Rollback Feature** empowers users to remove all or selected migrated data, enabling them to test and correct metadata before initiating initial migration

A robust and efficient software solution designed to simplify the migration of your documents from on-premises to the iManage cloud. With a focus on user experience, iSyncKit for iManage streamlines the migration process through a sleek and intuitive interface, saving you valuable time and resources.

Our innovative approach to automation ensures that migration tasks are executed seamlessly, while the software's comprehensive dashboard offers a transparent view of migration status and progress. Stay in control of your migration through real-time monitoring, management, and customizable reporting tools, which provide valuable insights for auditing and troubleshooting.

Choose iSyncKit for iManage as your go-to solution for a smooth and confident transition of your documents from on-premises to the iManage cloud. With its unique blend of user-friendly features and powerful automation capabilities, iSyncKit for iManage is the ultimate tool for a worry-free migration experience.

BENEFITS

- ✓ **Easy Implementation** MacroAgility offers a hassle-free implementation process, wherein the MacroAgility deployment team deploys and configures the software on the client's server automatically
- ✓ **iManage Sync Import** Promptly enables the concurrent transfer of documents and their history once access to the iManage environment is secured. This allows large migrations to run in tandem with other uplift migration project phases and accelerate delta migration
- ✓ **Disruptions Free** MacroAgility ensures that iManage Users can continue working uninterrupted during Collection or Migration, minimizing any disruptions to their performance
- ✓ **Traffic Optimization** iSyncKit adeptly addresses and prevents poor user experience and unexplained errors that could result from increased data traffic on the iManage Server
- ✓ **Intuitive User Interface** MacroAgility boasts a Simple UI making data migration effortless for small or complex data. With just few clicks, users can easily migrate single, multiple, or all workspaces
- ✓ **Quick Support** MacroAgility offers quick on-demand support to ensure that users receive prompt assistance whenever they need it

ABOUT MACROAGILITY

MacroAgility is a leader in providing fast, cost-effective delivery of iManage DMS. We provide iManage implementation, integration, and upgrade services, as well as iManage training, iManage support, custom development and professional consulting services. Our mission is to provide inventive, customized DMS and enterprise content management solutions that firms can depend upon as sources of professional confidence for years to come.
